JAPANESE DECIDES TO

TOKIO, Oct. 7. (P)—Viscount Gote, a former Cabinet Minister, who had announced his intention of making a visit to Moscow shortly, today announced that on the advice of his physicians he has decided to cancel the trip. Considerable interest developed in regard to the announcement that Viscount Goto was going to Russia. Although it was announced that he was going in a purely private capacity, the projected trip was viewed with special significance because of the Viscount's advocacy of a Russo-Japanese rap-

Germans Delay Hop to Azores

LISBON (Portugal) Oct. 7. (P)-De LISBON (Portugal) Oct. 7. (A)—Departure of the Junkers plane, D-1230, for the Azores, en route to the United States, was postponed today because of a thick fog at sea.

The plane, carrying Lilli Dillenz, Austrian actress, as a passenger, arrived here last night after having spent the preceding night at anchor off Santa Cruz, northwest of Lisbon. Although the German aviators plan to fly from the Azores to Harbor Grace, Newfoundland, there is a possibility that they will fly to the Bermudas, their decision depending upon weather conditions.

HUERTA'S BODY ON EXHIBIT

Stands All Day Tied to Tree in Plaza, as Warning to Rebels, Before Shallow Interment

NOGALES (Ariz.) Oct. 7. (P)—A mound of gravel in the desolate civis cemetery of Nogalea. Son., Mex., tonight marked the grave of Alfonso de la Huerta, former army officer and brother of Adolfo de la Huerta, former provisional president of Mexico.

He fell fighting yesterday seventy miles south of the border when cornered with his companion, Gen. Pedro Media by Federal troops, hunting him down as a rebel.

His bullet-riddled body today stood propped against a tree in the Nogales (Son.) plaza, for the edification of milling crowds.

Tonight it was dumped in its hasty grave. A piece of canvas served as a shroud and casket for the man who bore a name famous in Mexican history. A police patrol wagon was his hearse. A blood-soaked coil of hempen rope which had been used to truss the canvas-covered body, was the only marker on the graven mound.

WASHINGTON, Oct. 7. (Exclusive) Senator William Cabell Bruce of Maryland, Democrat, is a militant

tempt to cover up an earthquake with a carpet.

"In my opinion nothing could be more futile than the effort that is now being made by the party poltroon or pussyfooter to shift the attention of the Democratic party from such an absorbing and engrossing issue as prohibition, to such comparatively colorless issues as tax reform, tariff reform, election profilegacy, and the like.

"It is nothing less than an atsempt to convert the thought of the
party from an issue everybody is
thinking about to issues, to no small
extent unreal, that nobody is thinking about; or that are being thought
about only in a languid or pursity secondary way.

"I cannot see how anyone can
reasonably doubt the prohibition iss is the paramount political issue
at this time. The fanatical element
of our voting population, which was
mainly instrumental in bringing
ab at prohibition, is strenuously, if
not excitedly, endeavoring to keep
it from slipping down hill; while
the element of that population which
was opposed to prohibition has, unquestionably, been waxing stronger

BRUCE SAYS DRY MEANING OF AVIATION TERMS **DEFINED EXACTLY BY OFFICIALS**

WASHINGTON, Oct. 7. (P)—An authoritative pronouncement on the meaning of words touching the art of fiying has been issued by the Commerce Department.

When the word "aviation" is used, William P. McCracken, Assistant Secretary of Commerce in charge of aeronautics, has decided, it hereafter will be understood officially that its reference is to "the art of operating heavier-than-air craft." A less familiar term, "aerostation" was set down and officially defined as "the art of operating lighter-than-air craft."

The official nomenclature also holds that an airport is "a locality either on water or land adapted for the landing or taking of alreaft which provides facilities for shelter, supplies and repair of aircraft or a place used regularly for the receiving or discharging of passengers or cargo by air."

An airway similarly is described as "an air route between air traffic centers, with landing facilities at inavigation and a communication system for transmission of information pertaining to the operation of aircraft."

VOTE IN MISSOURI

"That the vote in Missouri was not adverse to prohibition was, it is fair to reason, due to the fact that the Missouri referendum was framed in such sweepingly reactionary terms that the St. Louis Post Dispatch, the Association Against the Prohibition Amendment and Senator James A. SATISFY a few to please many is bad," wrote Schiller, the German. He might have added, prosaically, "you can't please everybody," which illustrates the point that although U.S.C. plays a longer schedule than any other team in the Pacific Coast Conference this year some of the critics would have the Trojans add another game on their only open date, November 5.

H. M. Lennox writes: "I think U.S.C. has an open date November 5. This is more than you can say for Stanford and California. Why

not line U.S.C. up against San Francisco Olympic Club or St. Mary's? Some game, after sitting in on some that are past and also coming up. Yours for more real competition for U.S.C. and also for fans to see."

SOCCERITES TO TANGLE

Rival Southern Teams in Big Game Billed for Moore Field

(Continued from Ninth Page) that frame of mind the battle is apt to be gory, also productive of thrills, chills, and whatnot. Looming up like the well-known wart on a pickle, Capt. Oak Pendle-

ton, who leads his belligerent Poets into the fray, is expected to leave a few indentations on the Bruin hide with his galloping hoofs. The Poet with his galloping hoofs. The Poet leader, who incidentally guides the Quakers at quarter, is bringing with him a team of veterans, several of whom materially assisted in embarrassing the Bruin last year. Six men on the Poet roster saw service against the Bruins a season ago. They are Pendleton, Jertberg. Sheldon, Clevenger, Kimmell and Weaver. The Bruin team that we saw work out the other afternoon was a grimly determined outfit. Bill Spaulding's apphomores have been pushing the veterans for their jobs, and the Bruin squad as a whole is a hard formation to tackle right now.

In Joe Fleming the Bruins have a ball carrier whi is certainly the equal of Pendleton. The back-

Production Shows Gain, But Sales Slightly Off

Showing a net profit of 76 cents a sare for the third quarter and \$2.24 share for the nine months ended September 30, last, after all chargea including provision for depreciation depletion and drilling expenses, the Union Oil Company of California yeaterday released the first statement on the Pacific Coast of nine months' operations in the petroleum industry. Directors of the company also declared the regular quarterly dividend of 50 cents a share, payable November 10 to stockholders of record the 15th inst. The stock-transfer books will not be closed.

Net earnings for the first nine months of this year, after all charges, including depreciation, depletion and new drilling costs, were approximately \$8,500,000, or the equivalent of \$2.24 a share on the 3.789,303 shares of capital stock outstanding. This compares with net profits of \$9.730,000, or \$2.57 a share, in the corresponding period of 1926, a decrease of \$1,250,000.

sponding three months' period of last year.

Before deducting depreciation, depletion and drilling expenditures, profits amounted to \$16,350,000 in the nine months of this year, as against \$18,850,000 for the same period of 1926, a decrease of \$2,500,000. Depreciation, depletion and drilling expenses written off during the three quarters of this year amounted to \$7.850,000, as compared with \$9,100,000 in the same period a year ago. This decline in write-off is explained by the smaller number of wells drilled in the period just passed.

LONDON, Cet. 7. (By Wireless)—
The markets were steady though
quieter today, traders being occupied with preliminary arrangements of the carry-over. Artificial silk kept firm, with Coufftulis better. Imperial chemicals were also strong again, with expectations of the early con-clusion of far-reaching arrangements with the Farben Industries of Ger-many.

with the Farben industries of Germany.

Oils were depressed as a result of
more definite talk of the coming reduction of two pence a galion in the
price of petrol. This is apparently a
movement to eliminate distributors
whose operations have largely increased in recent years.

Buenos Aires Pacific's report shows
a dividend of 8 1-2 per cent earned
against 7 per cent paid. After largeer renewals of appropriations the
company suffered an exceptional decline in wine traffic through frost,
but traffic in cereals was unusually
good.

tifled with banking and business in to suggest for more than twenty gears, was yesterday elected chairman of the board of the Citizens' National Bank to succeed the late J. Ross Clark. The announcement was made by President J. Dabney Day, following the October meeting of the board. Mr. Connell has been a director and chairman of the executive committee of the Citizens' National for many years, and also a director of the companion bank, the Citizens' Trust and Savings. He has taken a leading parting the development of Los Angeles by the erection of seven Class A steel and concrete buildings, valued at more than \$3,000,000, all of which are under his personal management. They form the center of the wholesale dry-goods business and affiliated industries.

Mr. Day also appounced the slaction

et also research Perhaps the most daring prophecy in the October lot is that of Brookmire Economic Service, Inc., which holds that the Federal reserve policy is on the threshold of a change which will result in a more liberal use of our gold reserve to lower rates. The economists of that bureau call attention to the uninterrupted decline in prices for several years which has "pinched" some producers and forced the rate of business failures up, all of which, to bear in a demand for 'inflation'—that is, rising commodity prices through fuller utilization of gold reserves."

The number of passengers carried in 1926 was considerably less than the number transported in 1925, due to the fact that a transportation company operating in the vicinity of Long Beach, practically as a street-car system, carrying more than 1,000-000 passengers a year, was removed from the jurisdiction of the commission through annexation proceedings. Its operations are now wholly within the city of Long Beach and it is not required to file reports with the commission.

unsettled today with erratic fluctuations from a continuance of the recent mixed trading, owing to the great uncertainty of what tomorrow's government report will make the crop.

Where there was liquidation and southern selling of the last few days, bearing down on the market, a letup in that pressure this morning with a rally at Liverpool caused enough covering of shorts to rally prices between 25 and 30 points from yesterday's closing during the early trading. This brought December up to 21.25 cents by the end of the noon hour, against 21 3-8 cents for March and 21.75 cents for May, or about a cent, or 100 points from the low levels of just two weeks ago, when October to May contracts ranged between 19.90 cents and 20.75 cents.

There was no disposition, however, manifested among either local traders or trade interests to increase holdings to any extent pending the actual publication of tomorrow's report, which is due to be released at 11 o'clock, our time, from Washington. Trading here tomorrow will be suspended as usual five minutes before the report is due and not resumed until fifteen minutes after its appearance, to allow the trade here and in the South to digest its figures and it effect on the market.

There have been two surprising reports the last two months and there is apprehension there will be another. This accounts for the very nervous feeling which preveifed throughout the trade here to day, from the inability of the most astute trade interests and statisticians to guess with any degree of assurance—much less figure out from past experience what the government will make the crop.

When the last report was announced September 8, the trade was all set for a government estimate of about 13,000,000 bales, prices immediately jumped in this market 200 points, or \$10 a bale, the limit allowed for any one day's maximum

He was not aware of the fact, however, until after the wedding ceremony at the Church of the Messiah Thursday night, when the doors of nuptial bliss were opened one moment to be slammed in his face the next—because he had forgotten his marriage license.

The wedding, an elaborately arranged affair, was carried out in due form with Dr. Hugh K. Walker officiating.

The church was filled with friends. Beautiful bridesmaids and flower girls awaited the opening strain of the wedding march. Dr. Walker, in the rectory, however, insisted that the best man produce the marriage license.

Suddenly, as the minister waited, the strains of Beethoven's famous march pealed forth in the chapel. The best man had not arrived with the license but Dr. Walker thought it only an aversight and proceeded to the

Since his arrival in Los Angeles, Mr. Davis has been an extremely busy man. Although his chief interest was in the American Federation of Lavor convention, he found time to participate in various other events that completely filled his time. Yesterday, although no special events, were scheduled for him, his room at the Biltmore was crowded all during the day with many persons who wished to see him.

altar, where Mr. Smith stood while his bride was coming down the aisle with her father. At the flowery altar vows were exchanged and afterward scores of friends rushed to greet the bride and bridegroom with congratulations, but Dr. Walker again insisted that Mr. Smith's best man produce the license. Dismay shadowed Smith's face. He fumbled in his pockets and then remembered he had forgotten the important document. "Then you are not married and this is only a rehearsal." Dr. Walker explained to the bewildered bridegroom, who for a moment thought he was a husband.

An attempt to locate the County Cerk and get the license, for which notice of intention already had been posted, failed and the near-bride and near-bridegroom went their separate paths.

Yesterday, Mr. Smith was one of the first comers at the marriage license bureau, where he obtained the document and with Miss McCoy rushed to the home of Dr. Walker, where they were quietly married. Mr. and Mrs. Smith left immediately on their honeymoon and could not be located.

THE MEXICAN REVOLT
The latest attempt to overthrow by force of arms the constituted government of Mexico is tottering. Its leaders have either faced firing squads or are facing forces of loyal troops so superior in num-bers that the outcome appears to be fore-

It is probable that the prompt and ener getic action of President Calles has prevented, for the time being at least, another revolution which might have plunged all Mexico into bloody turmoil for an indefinite period and which largely would have un-done the rehabilitation work accomplished during the past few years of comparative

peace in that troubled country.

The present uprising undoubtedly had its seeds in politics, as have all similar revolts in the past. Its leaders, Serrano and Gomez, were the outstanding anti-administra-tion candidates for President at the 1928 elections. They had joined forces on what was called an "anti-re-electionist" platform, opposing the candidacy of Gen. Alvaro Ob-regon, former President and supposedly favored by President Calles as his succ It should be noted, however, that the sum mary action taken against these leaders of

nature, but was a military necessity. President Calles could have done no less than he has done, and no less energetically, and kept his oath to maintain the governmen

entrusted to him.

Serano and Gomez themselves elected and embarked upon the revolutionary course which was their undoing. Their position as political candidates did not mitigate, but aggravated, their offense. One has met, the other will meet it daught, the customary fate of traitors the world over customary fate of traitors the world over. They appealed to arms, and by arms their appeal was denied.

Sporadic revolts are always the after

math of revolution which brings about radical changes, and even the early history of the United States was not free from them for example. But comparison of the fairly peaceful course of the United States after the American revolution with political over turns in other countries cannot be madwith any exactness. The American cold nists were not seeking political freedom; they were, in fact, engaged in a conservative and not a radical effort; they were seeking to keep the measure of self-govern ment they already had, to preserve the rights granted in liberal charters from be ing taken from them by a king with a tend-ency toward absolutism. No parallel to this situation exists in history, and where conditions are essentially different results of course will not be the same.

The settling down of Mexico seems to h patient moderns to take a long time, but it much bloodshed in the process.

capable of restraining revolt, and President Calles, with a firm hand at the tiller, has weathered several storms. That the Serrano-Gomes attempt at rebellion met with no better success is pretty good evidence that the Mexican people, as a whole, approve the course their President has taken.

THE TREND IN EDUCATION

President Lowell a reiteration of the principles of self-education. The college cannot bers there is a school boy or girl in every educate its students, he told them; they six who come to California. The registramust educate themselves. When they finish their courses and go away, they will used feet, wheels and wings, as well as the carry with them what they have found and stork route, to reach the Land of Promise. acquired and not anything that has been given them. Higher education in the the automotive industry and the enthusiasm United States has a marked trend toward in aviation may be traced partly to the unithe British system, wherein each student is left to learn what he may and is required versal desire to come to California. Nev models hardly come out fast enough and only at intervals to report upon his prog-ress. The American classroom and recita-tion system is passing out and the seminar lecture room and individual research ideas

are growing in popularity and practice. Self-education is, of course, the only kind of education there is and every agency that can aid the student in personal interest and self-reliance tends positively to increase his ultimate effort and resultant success in at-tainment of educational goals. There are few students, however, who, left to them-selves, will continue the mental exercises that are so necessary in the whole scheme of education. The mind of youth needs exercise just as do the muscles of young athletes. The varsity men win their letters not by rambling methods and laziness, but

then, self-reliance must not become a sole precept at the expense of compulsory men-tal exercise. Carlyle remarked, "The true university of these days is a collection of books," and his definition does not miss the mark far in the present age, but in order to get the benefits of a university education a student must make use of the col to twiddle his thumbs astride the fence in the grand aspect of self-education in mod-

ern universities.

The breadth of education available to college students in this age is a marvelous privilege. Our modern college gives to ach student the opportunity to prepare for a career of service to his fellows and to himself. There are brilliant students dull students, indifferent students and not e few who should not be students at all. In varying material the greatest benefit their minds should be directed to safe goals by safe mentors. The bigger minds will come to the top from out of the mass and claim greater self-education, but the average get his self-education by a system of super vision and credits that carry him toward some sort of a definite objective.

TYE-TEETH CUT L No wonder the modern young woman is so sophisticated. Girl babies are being born with their eyeteeth already cut.

By James J. Montague Full well she knows that her array Serves not to keep the cold away— The chill wind blows

Straight through her hose
And knee-revealing dresses,
There's nothing in the world to check
The rain from running down her neck

As forth she strays
On wintry days
Since she has bobbed her tresses.
But does she give a single jot?
No, gentle reader, she does not.

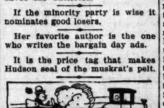

The outraged doctors storm and scold, And say she's bound to catch a cold Or vow unless She learns to dress With some sane circumspection, She'll suffer from congestive chills And other forms of dreadful ills

And by and by
She'll wonder why
She's losing her complexion. She'll tell him calmly he is right And never change her ways one mite.

She knows that too much dancing serves To play the dickens with her nerves,

She knows that going thinly gowned And eating candy by the pound, And pouring in
Synthetic gin
Is sheer defenceless folly.
But can we change her ways one jot?

Too Much Ridicule

SANTA MONICA, Oct. 5.—[To the Editor of The Times:] The American Irish Vigilance Committee is justly indignant. This committee charges that producers and distributors have held the Irish race and the Roman Catholic religion up to public ridicule and contempt. It has petitioned for the separation of Will H. Hays from his \$150,000 job as czar of the movies. The time is rotten ripe for something of the sort. The Irish and the Catholics are not the only ones held up to scorn. Protestant ministers and American ideals are also insultingly caricatured. It might be a good idea for the American Protestant Vigilant Committee to also start functioning. There is no need to scandalize any race, or religion, or any American ideal in order to entertain or amuse the content of the choices and moving the content of the choices of the choices of the content of the choices of the content of the choices of th mittee to also start indicated in the presumably as a manage of radioactive matter in the presumably as a mittee to also start indicate in order to entertain or amuse an intelligent American audience. SAWTELLE, Oct. 5.—[To the Editor of The Times:] It seems that some one is always on guard to see that the Irish do not get any credit for anything except just being Irish and they can't be robbed of that distinction anyway. Nothing can ever dim the glory of the achievements of those valiant patriots of our revolution. They were first of all Americans or they would not have done what they did. The Irish did not come to this country in great numbers until half a century after the revolution and they have helped us to win every war since then. No people have been more quickly assimilated and made into genuine Americans than these same Irish, as the following old story illustrates. A ship loaded with English, Scotch and Irish immigrants was coming into New York Harbor. They were all crowded about the rail while a ship's officer pointed out to them a famous spot on shore where the American soldiers had defeated the British in the Revolutionary War. An Englishman on the fringe of the crowd asked an Irishman what all the commotion was about. The Mick replied: "Sure, that's the place where we licked hell out of you in our revolution."

LOS ANGELES, Oct. 5.—(To the Editor of The Times:) Will you kindly ask through your columns why Mr. Green, president of the American Federation of Labor, does not prevent the radical elemant of the labor organizations during strikes, destroying property, committing assaults and murder? This he could do by issuing an order that every man in the different union labor organizations guilty of the above-mentioned crimes shall be prosecuted to the full extent of the law and that no money will be furnished for their defense by any organization within the federation WILLIAM D. A Worthy Beacon

ALHAMBRA, Oct. 3.—[To the Editor of The Times:] The project to put a Lindbergh beacon light on the City Hall seemed to be well received, but in the hands of the committee has lost its urgency so much so that to date less than \$1000 has been subscribed. What a shame!

Instead of setting the cost at \$3000 it should be made six or eight times that amount if naces.

eight times that amount if necessary, and make it something artistic to be seen day and night. A searchlight of great strength could be seen only by night, and every field in the country would be so lighted. Why not have something distinctive, and more nearly fitting the occasion, and more in keeping with the wonderful tribute given Lindbergh when here?

May I suggest the following: At top of the City Hall place a large globe (the world,) build a bronze frame and fit it with varied colored glass to show land and water with an airplane over it on its way to

an airplane over it on its way to Paris. The very excellent map by Charles S. Owens gives the idea. Paris. The very excellent map by Charles S. Owens gives the idea. The frame to give the lines of land and water properly carried out for both continents. The metal is fusible and can be put into any desired shape, all joints welded and the glass made to fit to make a perfect globe. Size, as large as can be architectually brilliantly lighted to show at night as well as day the show at night as well as day the civic center of the city.

YOUNG SET" The Baby Show

By LUCILLE VAN SLYKE

This is another of a series of short stories, each complete in itself, detailing the amusing war of the insurgent youngsters against the conservative oldsters of an old-fashioned town.

A DA WINSLOW'S latest fiance—
who hoped to be the last of a rather long line of that fair damsel's suitors—had a grudge against young Mrs. Eugene Huntington Bilss, Jr. With Blunt masculinity, he told everybody about it.

Of course, Ada had to pick out a perfectly new set of bridesmalds, because so many of those she had chosen the year before were on honeymons of their own, but the details were as good as settled, Ada dropped into Babs's tea-room one morning late in August to ask Babs if small Gene could be a ring-bearer.

"He'il look such a duck, Babs! I want him dressed like one of those kins in the old Kate Greenway drawings—voul know, now, cores."

"It's not fair, Barby. The rest laven't a chance, and it—it will look queer—your winning—considering that it atsrice everything."

It was announced a few days ago that Arien would play the lead with Mary Brian in "Under the Tonto Rim," the next Zane Grey western to be made at the Hollywood studio. This picture will be made under the direction of John Waters before production of Wooden Dollars" starts. The Bebe Daniels picture will be directed by Gregory La Cava, thus temporarily disbanding the Bebe Daniels—Clarence Badger combination that has held through "Senorita." "Swim, Girl, Swim" and others. We are assured, however, that Badger will direct the next Daniels picture to follow "Wooden Dollars."

Winfield Sheehan Comes Home
Winfield Sheehan, head Fox official, has returned home after a long absence in New York and abroad. He was in his office for a short time yesterday, d u ring which he was busy reading wires, answering c o r respondence and telling those who dropped in how good "Carmen" is. He promises within a day or two to get his affairs into such shape that he will be able to make a f e w announcements regarding future Fox activities.

Sheehan and a large party were among those present last night at the brilliant opening of "Carmen" at the Carthay Circle Theater.

Olga Baklanova with Universal
When Universal officials set out to
cast the role of the vampirish Duchess Jasiana in "The Man Who
Laughs," they decided that they mustengage a lady of such alluring quality that she would simply put to
shame even the standard Kipling
Lorslei of rag-and-bone-and-hank-ofhair fame. They made screen tests
of at least a score of potential professional heart-breakers.
The upshot of their pleasant duty
was that they engaged yesterday for
the part the fascinating Olga Bakianova, who has just completed a
vamp role with Emit Jaunings in his
current Paramount vehicle.

Miss Baklanova had ten years of
success on the stage before she went
into pictures. She was born in Moscow, the daughter of Vladimir and

WOMEN MAKE PLEAS

Mrs. Ethel A. Holmes of Los Angeles and Mrs. Anna Fitzgerald, fraternal delegates to the convention from the Woman's International Union Label League and Trades' Union Auxiliary, were presented by President Green, in his capacity of chairman, both making appeals to the delegates for their persistent aid in the education of the children of the present day, through the housewives, in the use of goods bearing the approval of the union. "The union label," said Mrs. Pitzgerald, "is the one weapon that has not as yet been enjoined."

J. B. Madril, vice-president and manager of the Union Laber Life Insurance Company, spoke of the benefits of that organization and urged as a reason for its support by the delegates and members they represent the fact that it is the only insurance policy bearing a union label.

Reporting for the committee on labels, C. A. Weaver the convention of the convention of the children of the delegates of the union label.
